

2Market

Exploratory Analyses

Outline Of Presentation

- Context
- Recommendations
- Assumptions And Risks
- Methodology
- Results
- Discussion
- Conclusion

Context

- A global supermarket which sells products online and in store.
- Customer purchase behaviour
- Demographics of their customers
- The most effective advertising channels
- Which products sell the best
- Demographic variance.

Recommendations

- 2Market should consider marketing campaigns in the United States for example as total spend is only \$65,829 compared with Spain which is \$657,532.
- Increase social media advertising as these taken together were more effective as an advertising channel than e-mail and brochure.
- 2Market should reevaluate print (brochure) advertising to ensure cost effectiveness as this produced the lowest number of lead conversions across countries and marital status.

Recommendations

- 2Market should consider improving its website to enhance search engine optimisation advertising as 41% of sales were online.
- Gather customer feedback through surveys, social media and direct interaction in countries such as the United States of America, Australia, India and Montenegro.
- Conduct market research in United States, Australia, India and Montenegro to study market trends and competitors so as to establish what they are doing that 2Market is not doing.
- Improve product offering, product quality and product mix.

Assumptions And Risks

- No duplicate values were found. Each customer had a unique ID
- No data privacy concerns as there is no personally identifiable information.
- Data used is GDPR compliant.

Methodology

- Problem statement
- Five Why framework
- Evaluation of Five Why
- Questions to ask the 2Market team
- Questions I would like to ask of the data
- Visualise the data in excel

Methodology

- Tableau visualisations
- Query the data with SQL
- Joined and analysed tables in SQL

The most effective advertising All by country

Age Group With The Highest Spend

Which Product Sells The Most In Each Age Group

Which Country Sells The Most

Discussion

- Average age of 2Market customers is 54
- The average age of customers who earn a yearly income between US\$90,000 and US\$100,000 is 52 years.
- Younger 2Market customers are likely to be either single or a couple while much older customers are more likely to be widowed.

Discussion

- The income range for the highest average age value is \$53,701 and the income range for the lowest average age value is \$28,269.
- Spain is the country with the most sales (\$657,532).
- Liquor is the most popular product in each country. This observation is true for marital status and whether there are kids or teenagers at home.

Discussion

- Across countries, Twitter is the most effective method of advertising albeit marginal. This observation is true for marital status as well.

Conclusion

- On the whole, 2Market has higher sales in Spain, South Africa and Canada.
- Although there is no data on overheads and sunk costs, the low sales figures in countries such as the United States, Australia, India and Montenegro suggests that 2Market may be operating at a loss in these countries.
- 2Market should increase marketing campaigns and social media marketing in these countries to increase sales and revenue.

Thank you
